Re: Docket #07-16

Dear Secretary Dortch,

Educational resources are almost unlimited on the internet. Teachers and students are both able to access tools to help their learning experience. For many teachers and students, they are limited in what access they have to fast, broadband internet at home, and even at school. Whether they're rural or inner-city, the cost of broadband can be too much pay.

By approving the plan by M2Z Networks, free, fast broadband would be available to any home with a modem. This would make it easier for teachers and students to go on-line and improve the education they provide and receive. Under this plan, using sophisticated filters, the internet would also be safer and parents would not have to worry about the access their children are receiving.

The education of our children is important to me, as is the ability of our teachers to have the best possible resources any time they need them. I ask you to support the plan to provide more broadband to Americans.

Sincerely,

Delegate Bill Hamilton

Re: Docket #07-16

Dear Secretary Dortch,

Over 60 percent of our business is derived from online sales!

When considering the proposal by M2Z Networks to receive spectrum for a wireless broadband internet network, I ask you to consider the positive impact this could have small and independent businesses like mine. In doing so, please consider that 99 percent of all businesses are small businesses, and improvement in this one area can greatly impact the economy in a very positive way.

With broadband access more available, many who are not taking advantage of the benefits will be able to run their businesses more efficiently. Every day, small businesses need to be aware of the news around them, in their field or in the economy in general. Having broadband at their fingertips will keep them more aware and able to use the many tools the internet has to offer.

Small businesses are so important to the economy in this country, and in the communities where they operate. I urge you to allow these business owners to benefit from this opportunity. The country as a whole benefits from more successful small and independent businesses.

Re: Docket #07-16 to provide fast, free, family-friendly wireless broadband internet access

Dear Secretary Dortch,

The Internet is a valuable resource for small businesses everywhere. There are tools available to help business owners run their business more efficiently, as well as market online and make sales. In just the same way, consumers rely on the internet to make their purchasing decisions. Both businesses and consumers are helped by having access to the Internet.

For the sake of many businesses that are unable to receive broadband, due to cost or rural location, I support the proposal by M2Z Networks to provide free, fast wireless broadband internet access to all Americans. I support the plan to get more businesses and consumers online allowing them to have websites and make purchases as efficiently and effectively as possible. Cost and lack of service in many areas creates a digital divide for many small businesses in this country.

I hope you will approve the proposal by M2Z Networks and make free, fast wireless broadband internet service a reality for millions. The success of small businesses affects each of us, with small businesses like mine making up 99 percent of all businesses. Thank you for considering what this proposal can do for our businesses and please support the proposal to provide fast, free, wireless broadband internet access to all Americans.

Thank you.

Sincerely,

David Lloyd

Re: Docket #07-16

Dear Secretary Dortch,

I'm writing to you asking for support of the M2Z Networks proposal to provide free, fast and family-friendly broadband internet access to all Americans. Making broadband available in more homes, and making it affordable, is a positive move for everyone, and I support this.

To many students, families and teachers, working on-line at home is vital to their education and preparation for school. Yet only 42 percent of America's homes have broadband internet. With high-speed access, using the tools and resources available on-line would be easier and they could experience more of the internet's benefits.

Broadband access is important for the education of our children, and the teachers who need as many resources as possible to help them. I ask you to support this proposal and bring affordable broadband to homes across this country.

April 6, 2007

Secretary Marlene Dortch
Federal Communications Commission
Office of the Secretary
445 12th St. SW
Washington, DC 20554

Dear Secretary Dortch,

For small business owners everywhere, such as myself, there is a daily choice made to spend resources in the most valuable way. For many, the choice to receive broadband internet access is not a viable one. Whether their location prevents them from receiving broadband, or the cost is simply unaffordable, it would improve their business to not have to make this choice.

It can be possible for all small businesses to use broadband internet with the proposal made by M2Z Networks. I support allowing M2Z Networks to receive the spectrum it needs to provide free broadband service because I know as a businessman, the important resources this opportunity would provide. It would allow businesses everywhere, with just a modem, to go on-line at high speed while saving valuable resources.

This proposal can improve the daily performance of small businesses while allowing them to focus their resources on other necessary expenses. I support this proposal and the great things that be accomplished with its approval.

Sincerely,

Randy Cole

Dear Secretary Dortch,

I'm writing to show support for the Docket # 07-16 proposal to provide free, fast broadband access to all Americans, especially because of the benefits it will bring to businesses. Without broadband access, many businesses are unable to have the best marketing capabilities and connectivity with their industry. When businesses are run more efficiently, we all benefit.

In many areas, broadband is not available at all, or not a financially viable option. Currently, just 35% of small businesses have websites. The economy depends on successful small businesses, and many could improve by becoming participants in the on-line market. With 99% of business in American being done by small businesses, the economy and local communities can benefit from more successful small and independent businesses.

Please approve the proposal by M2Z Networks to provide fast, free broadband internet access. Our economy depends on businesses keeping up with the best technology available.

Regards,

CC: FCC Chairman Kevin Martin

Re: Docket #07-16

Dear Secretary Dortch,

Less than half of America's homes currently have broadband internet access. That means millions of parents and children are not as connected as they need to be for their educational needs. There is a chance to change that by supporting the M2Z Networks proposal to provide free, fast and family-friendly broadband to everyone, and I ask you to do just that.

If allowed to receive the needed spectrum, anyone with a modem would be able to receive broadband internet. With faster internet, families and children can explore the internet most efficiently and gain more knowledge. Our children need to remain competitive in the global market, and currently other nations have more broadband available.

We can give students the advantages they need to make their education even more expansive. I ask you to approve the M2Z Networks plan to offer broadband to all Americans. Thank you for your time.

Sincerely,

Troy Andes

Re: Docket #07-16

Dear Secretary Dortch,

Access to broadband internet is more important than ever. Children need more access for their education, and businesses need more access to run more efficiently. With so much education and commerce being done on-line, the fewer people who have access, the less competitive our country will be.

I ask you to support the M2Z Networks proposal to offer free, fast broadband access to any American with a modem. By doing this, people who live in areas not currently connected to broadband will have access. Also, people who cannot afford broadband will be able to make the most of their internet experience.

This country benefits from a more connected, educated and efficient society, regardless of where people live. Opening broadband access to everyone benefits us all. Thank you for considering this proposal.

Sincerely,

Office of the Secretary
445 12th St. SW
Washington, DC 20554

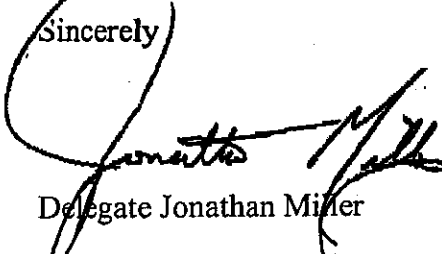

Dear Madame Secretary,

Many Americans are left without access to broadband internet service due to their location or economic circumstances, but there is an opportunity to change this. By approving of Docket #07-16, the FCC would allow access to be extended to more Americans and without a fee.

I approve of the proposal by M2Z Networks, allowing them to receive the spectrum needed for this service. The outcome would benefit people from all walks of life and communities across the country. With just a modem, students, parents, seniors and businesses would be able to access the internet for e-mail and web, connecting them to sources of news and information.

I ask the FCC to support the plan to provide free, fast broadband access to all Americans. In doing so, this country will be able to bridge the digital divide and stay competitive with other countries technologically.

Sincerely,

Delegate Jonathan Miller
